Stainless steel pig feeder's size and material thickness can be customized according to customer needs.

Product Description

Deba Brothers® is Stainless Steel Pig Feeder manufacturers and suppliers in China who can wholesale Stainless Steel Pig Feeder. The biggest cost is the cost of feed, how to save feed is an eternal topic in the pig industry. People gradually realize that a good feeder can save a lot of feed for pig farms. In addition, a good feeder can also save water. Therefore, good dosing systems are cleaner and more durable. For the feeder we must use 304 stainless steel material as the basic material, ensure that there won't appear quality problems in the whole service life. In the old feeder design, the feed power would be left in the corners of the feeder. What leads to easy deterioration. The pig would easier get serious health problems, after eating those feed. Our mission is to solve this problem without causing unnecessary losses to farms.

Stainless Steel Pig Feeder Accessions

Fence	PP board/Wholly hot-dip galvanized stall
Floor	Cast iron floor
